Electromedical Products International, Inc. (EPI) is always looking for researchers and clinicians who are interested in conducting research. While EPI does not pay salaries for researchers, the company will loan Alpha-Stim devices set up for double-blinded studies, as well as provide or arrange for help in designing protocols, informed consent forms, provide references, conduct the statistical analyses, etc.

Those interested in doing research with Alpha-Stim products should contact Jeffrey A. Marksberry, M.D.,
Director of Science and Education at Jeff@epii.com, or Larry R. Price, Ph.D, Director of Research at Larry@epii.com.

Randomized Controlled Trials

Title: Alpha-Stim Research Bibliography

**Case Series and Case Reports**

**Meta-Analyses, Commentaries and Review Articles**

7. Zaghid, Soroush, Acar, Mariana, Hultgren, Brittney, Boggio, Paulo S. and Felipe Fregni. Noninvasive brain stimulation with low-intensity electrical currents: putative mechanisms of action for direct current and alternating current stimulation. *Neuroscientist Online First*. December, 2009, 24 pp. *Note:* The authors classify the Alpha-Stim with a group of AC devices (it is a bipolar DC), but admit that the effects may be highly dependent on the specific parameters of stimulation.
